## Deprivation

The Index of Multiple Deprivation 2010 identifies that in Battle there is higher than national average deprivation levels for children.<sup>1</sup>

## Crime

Battle has high levels of burglary and low levels of ASB compared to Reading overall.

## Residents' Feedback<sup>2</sup>

Battle residents say health services, libraries, public transport, education and play activities for children are important to them.

A Council survey<sup>3</sup> in July 2013 to gauge local opinion in the Battle Ward about priorities for local facilities and infrastructure highlighted education and learning and Green Space including play as the highest importance. A 298 signature petition supported by Oxford Road Children's Centre was also submitted seeking a purpose built community hub in or near the West Village area.

Improvements to indoor and outdoor leisure facilities, including swimming were also requested.

Battle ward residents have a higher than average likelihood of saying there is a need of improvement in relation to clean streets and good neighbours. They show higher levels of dissatisfaction with the area as a place to live. Residents in

Battle are particularly likely to report feeling unsafe after dark), and are most likely to feel unsafe during the day. They are more likely than others to say that there is a problem with:

- Noisy neighbours or loud parties
- Large groups of people hanging around the streets
- Rubbish and litter lying around
- People using or dealing drugs
- People being drunk or rowdy in public places

They would like to tougher licensing laws for shops selling alcohol cheaply and removal of street drinking around Oxford Road.

The Oxford Road North and South Neighbourhood Action Group surveys showed that the priorities for both areas were: Drugs, Prostitution and Alcohol related anti-social behaviour<sup>4</sup>

---

<sup>1</sup> [www.localhealth.org.uk](http://www.localhealth.org.uk)

and deaths caused by circulatory and heart disease are higher than average.

## Deprivation

The Index of Multiple Deprivation 2010 identifies that that in Church there is higher than national average deprivation levels for income, children and older people.

## Crime

Church has high levels of burglary compared to Reading overall.

### Residents' Feedback<sup>2</sup>

Church residents are more likely to mention that improvements are needed in the level of crime and good neighbours.

They have higher levels of dissatisfaction with local area and are more likely **not** to feel a strong sense of belonging to their immediate neighbourhood than those in other wards

They show more satisfaction than those in other wards with the local bus service and Housing services. A higher than average proportion have never used Leisure centres or Reading arts venues.

Respondents in Church most likely to disagree that the council provides value for money, they are more likely to not feel informed with respect to how and

where to register to vote and how council tax is spent and what standard of service they should expect from local public services. Church residents are more likely to feel uninformed overall and are more likely to definitely disagree that they can influence decisions in their locality.

Church residents are more likely than those in other wards to feel there was a problem in their local area with people not treating one another with respect and consideration.

They show higher concern about:  
 Noisy neighbours or loud parties (30%)  
 Large groups of people hanging around the streets (42%)  
 Rubbish and litter lying around (52%)  
 Vandalism, graffiti and other deliberate damage to property or vehicles (42%)

They are particularly likely to report feeling unsafe after dark)

The Neighbourhood Action Group survey<sup>3</sup> showed that the priorities for the area varied depending on whether residents came from north or south Church:

NAG priorities			
<b>Whitley North</b>	Speeding	Anti-social behaviour (drunken behaviour and noise nuisance)	Drugs
<b>Whitley South</b>	Speeding	Parking	Burglary

In response to a Pocket Places for People consultation<sup>4</sup> to encourage sustainable travel choices such as walking and cycling in the Northumberland area residents also said that speeding was an issue. They also repeatedly mentioned that there aren't any places to meet people and socialise. They wanted to see:

1. A balance of the need of pedestrians, cyclists and motorists.
2. A clean environment- the street free

<sup>3</sup> Neighbourhood Action Group Survey, Community Safety Partnership, July 2013

<sup>4</sup> Pocket Places for People

<sup>2</sup> Residents Survey 2012, Reading Borough Council

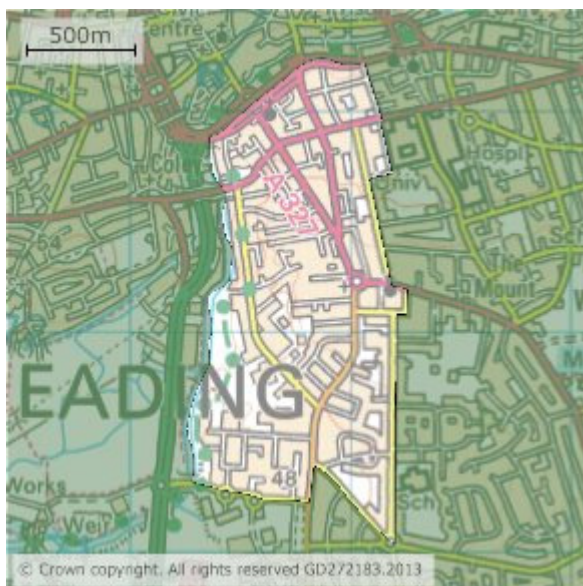

from litter and dog fouling.

3. Play, sport and socialising for children and young people

4. Food growing, trees, flowers and parks.

5. A lively street- Activity outside shops, street parties and meeting people.

## Katesgrove Ward Snapshot

families have one child under 5 years old. At 10.3%, Katesgrove has the highest proportion of multiple occupation households.

The area has mainly flats (44%) or terraced (40%) housing.

Home ownership at 36% is lower than the Reading average and private renting is high at 45%.

The proportion of households without central heating (5.6%) and overcrowding is higher than the national average.

Whilst the proportion of pensioner households is low a higher than nation average are living alone.

### Total Population

The 2011 Census estimates the population of Katesgrove ward at 9893. There is a higher proportion of males than females in the ward.

Male	Female
52.4%	47.6%

### Age

The age profile of the ward shows higher proportions in the 20 - 34 year age bracket and lower proportions of 6-18 and over 60 year olds.

### Households and Housing

There are an estimated 4230 households. There are higher than average single person households (35.5%) and higher proportions of couple households. 33% of

### Diversity

Katesgrove has an ethnically diverse population. The largest ethnic groups are:

- 49.7% White British
- 22.85% Asian/Asian British of which 8.4% are Indian or British Indian and 5% are Pakistani or British Pakistani
- 7.6% Black/African/Caribbean/Black British of which 5.4% are African.

60.8% of the population were born in the UK. 8.5% have been resident in the UK for less than two years and the ward has a higher than average proportion of its residents who have lived in the UK less than 10 years.

74.6% have English as their main language. Of those who do not have English as their main language a high proportion (11.9%) speak English very well and 3.5% do not speak English well.

Katesgrove ward has the highest proportion of Buddhists in Reading and at 6.5%, a high proportion of Hindus.

## Economic Activity

A higher than Reading average proportion (51.3%) of the working age group work full-time and at 4.5% the proportion of retired people is half the Reading average.

Overall unemployment levels are average for Reading.

Claims for key out of work benefit are higher than the England average.

DWP benefit claimants (February 2013)

	OOMCNH : Whitley (numbers)	OOMCNH : Whitley (%)	Reading (%)	Great Britain (%)
Total claimants	1,445	19.4	-	14.3
Job seekers	350	4.7	-	3.8
ESA and incapacity benefits	595	8.0	-	6.2
Lone parents	210	2.8	-	1.3
Carers	125	1.7	-	1.3
Others on income related benefits	40	0.5	-	0.4
Disabled	110	1.5	-	1.1
Bereaved	15	0.2	-	0.2
Key out-of-work benefits*	1,195	16.0	-	11.7

Source: benefit claimants - working age clients for small areas  
 \* Key out-of-work benefits includes the groups: job seekers, ESA and incapacity benefits, lone parents and others on income related benefits. See the Definitions and Explanations below for details  
 Note: The percentage figures show the number of benefit claimants as a proportion of resident population aged 16-64.

## Health

81.9% of the Whitley population report good health. This is average for England but below the Reading average of 85.5%. A higher than Reading average report limiting long term illness (15.9%) although this is below the England average. 8.8% are carers which is lower than the Reading average but higher proportions are providing care over 20hrs per week.

Child obesity is significantly higher than the England average.

Life expectancy is similar to the England average.

## Deprivation

The Index of Multiple Deprivation 2010 identifies that deprivation levels in Whitley are significantly higher than the England average.

The figures for Whitley, on a series of factors understood to be an impact in child poverty, are significantly worse than the England average.

### Crime

Crime levels are higher than the Reading average for theft of a motor vehicle, assault without injury and communal anti-social behaviour.

### Residents' Feedback<sup>1</sup>

Residents in Whitley regarded job prospects as in most need of improvement. Whitley respondents have the higher dissatisfaction with their local area as a place to live. They are less satisfied with Parks and open spaces and Children's services. They are more likely to say they have never used Leisure centres,

Libraries, Reading arts venues and Planning and building control services. They are more likely than those based elsewhere to be dissatisfied with the way the council runs things and to disagree that the council provides value for money.

They are more likely to think there is a problem in their local area with people not treating one another with respect and consideration and are concerned about large groups of people hanging around the streets, vandalism, graffiti and other deliberate damage to property or vehicles.

Those in Whitley are the least likely to agree that in their local area parents take enough responsibility for the behaviour of their children.

Higher proportions of children travel to school by car (77%).

The Neighbourhood Action Group survey<sup>2</sup> showed that the priorities for the area varied depending on whether residents came from north or south Whitley:

NAG priorities			
<b>Whitley North</b>	Speeding	Anti-social behaviour (drunken behaviour and noise nuisance)	Drugs
<b>Whitley South</b>	Speeding	Parking	Burglary
